Vigilant ${ }^{\oplus}$ LED Based L-865 / L-864
Medium Intensity (White / Red) Strobe

Application:
The all LED Dialight Vigilant ${ }^{\text {® }}$ medium intensity White / Red strobe is designed for the lighting of communication towers, chimneys, smoke stacks, wind generators and other obstructions to aerial navigation, as specified by the FAA. The Dual L-865 / L-864 uses LED technology for light output from both the White / Red strobe.

Unlike conventional Xenon flashtube technology, provides years of maintenance free service. Working voltages of less than 200V DC are significantly less then those of Xenon flashtube designs, therefore, this system represents an advance in safety. The Dialight Dual L-865 / L-864 LED beacon operates from a 48 V DC supply.
